2019 OA Hackathon

The 2019 OA Hackathon will focus on enabling Arrowmen to integrate technology and problem solving to meet new and evolving needs as the Order of the Arrow continues into its second century.

Who: Every Arrowman, with or without experience!
What: A 'hackathon' with Novice, Intermediate, and Advanced tracks
When: June 26th-30th, 2019
Where: University of Illinois at Urbana-Champaign
Cost: $295 registration fee, $30 late fee after May 1st
**How:** Visit oa-bsa.org/hackathon for more information

Novice

Have no experience, but still interested? No worries, everyone is welcome attend the 2019 OA Hackathon. **Novice** delegates will focus on experiences and learning new skills, both in technical and in leadership aspects. They will compete in an innovative display and have the opportunity to earn merit badges and possible requirements for Nova awards.

Intermediate

Intermediate delegates will spend half of the program gaining technical and leadership skills and then will compete against each other in a typical "hackathon." Delegates will be challenged in a 24 hour competition to solve problems through technological efforts to mitigate a real-world issue within our organization. These Arrowmen should have some exposure to computer programming before arrival.

Advanced

Advanced delegates will work together in teams made with varying technical knowledge to brainstorm and develop innovative technical solutions. This will be the more typical hackathon program, as delegates challenge each other to help develop solutions to assist lodges around the country. Arrowmen participating in this track should have experience in coding in multiple programming languages.
